Risk Disclosure Statement

Effective Date: 20/06/2024

1. Introduction

This Risk Disclosure Statement is provided by Earthdex FX to inform you of the potential risks involved in trading foreign exchange (forex), commodities, indices, and other financial instruments. By using our services, you acknowledge that you have read, understood, and accepted this Risk Disclosure Statement.

2. General Risk Warning

Trading financial instruments involves a high level of risk and may not be suitable for all investors. Before deciding to trade, you should carefully consider your investment objectives, level of experience, and risk appetite. You may sustain a loss of some or all of your initial investment, and therefore, you should not invest money that you cannot afford to lose.

3. Leverage Risk

Leverage can work for you or against you. The use of leverage can lead to large losses as well as gains. Higher leverage increases the risk of losing your investment, and it is possible to lose more than your initial margin. Ensure you understand the risks associated with leveraged trading.

4. Market Risk

The prices of financial instruments can be highly volatile. The price movements of forex, commodities, indices, and other instruments can be unpredictable and may be influenced by a variety of factors, including but not limited to political events, economic news, market sentiment, and sudden changes in market conditions.

5. Liquidity Risk

Market conditions can affect the availability of liquidity for your trades. In some cases, you may find it difficult or impossible to close a position at the desired price. Lack of liquidity can result in greater losses and increased costs.

6. Margin Risk

You must maintain the required margin level in your account to keep your positions open. If the margin in your account falls below the required level, your positions may be liquidated, and you may be liable for any resulting deficit in your account. Ensure you fully understand the margin requirements and monitor your account regularly.

7. Counterparty Risk

When trading with Earthdex FX, you are exposed to counterparty risk. This is the risk that [Your Company Name] may default on its obligations. Ensure you are aware of the counterparty risk and understand how it may affect your trading activities.

8. Technical Risk

Trading platforms and systems are subject to technical risks, including but not limited to hardware and software failures, internet connectivity issues, and cybersecurity threats. These technical risks can lead to trading disruptions, delays, or errors.

9. Regulatory Risk

Changes in laws, regulations, or policies can impact your trading activities. Regulatory changes can occur without notice and may affect the availability, conditions, and legality of trading certain financial instruments.

10. Risk of Automated Trading

If you use automated trading systems or expert advisors, you should be aware that these systems carry their own set of risks, including but not limited to programming errors, system failures, and unexpected market conditions. Automated systems may not perform as expected and can result in significant losses.

11. Conclusion

This Risk Disclosure Statement is not exhaustive and does not cover all potential risks associated with trading financial instruments. It is important that you fully understand the risks before engaging in trading activities. Seek independent financial advice if necessary.
